

# 1.3.0 Documentation

This page contains the documentation for the 1.3.0 release.

## 1. OpenORB

- OpenORB ( [FAQ](#), [Manual](#), [Source Javadocs](#) )

### 1.1. Extensions

- RMI over IIOP ( [FAQ](#), [Manual](#), [Source Javadocs](#) )
- SSL ( [FAQ](#), [Manual](#), [Source Javadocs](#) )

## 2. CORBA Services

- Concurrency Control Service ( [FAQ](#), [Manual](#), [Source Javadocs](#) )
- Event Service ( [FAQ](#), [Manual](#), [Source Javadocs](#) )
- Naming Service ( [FAQ](#), [Manual](#), [Source Javadocs](#) )
- Notification Service ( [FAQ](#), [Manual](#), [Source Javadocs](#) )
- Persistent State Service ( [FAQ](#), [Manual](#), [Source Javadocs](#) )
- Property Service ( [FAQ](#), [Manual](#), [Source Javadocs](#) )
- Time Service ( [FAQ](#), [Manual](#), [Source Javadocs](#) )
- Trading Service ( [FAQ](#), [Manual](#), [Source Javadocs](#) )
- Transaction Service ( [FAQ](#), [Manual](#), [Source Javadocs](#) )

## 3. Utilities

- Interface Repository ( [FAQ](#), [Manual](#), [Source Javadocs](#) )
- Management Board ( [FAQ](#), [Manual](#), [Source Javadocs](#) ) - GUI administration tool for Interface Repository, Naming Service, Trading Service, and Notification Service

## 4. Libraries

- Evaluator Utility ( [Source Javadocs](#) ) - implementation of the Trader Constraint Language
- Tools ( [Source Javadocs](#) ) - common classes used by all the packages

## 5. Package Dependencies

The OpenORB packages, especially the services, have complex dependencies. We have put together a diagram showing the dependencies for each version:
